(54) SYSTEM FOR PREPARING DESCRIPTION FOR PATENT APPLICATION AND METHOD THEREFOR AND RECORDING MEDIUM RECORDED WITH PROGRAM FOR PREPARING DESCRIPTION FOR PATENT APPLICATION

(57)Abstract:

PROBLEM TO BE SOLVED: To prepare patent application document data by transmitting and receiving original data through a server between a client used by an inventor who prepares the original data of description for patent application, and a client used by a person in charge of application processing who proofreads the original data.

SOLUTION: A client 100 inputs original data prepared by an inventor by an original preparing means 101, and transmits the original data and invention report information to a server 300 by an original up-load means 103. The server 300 receives the transmitted original data and invention report information by an original receiving means 301, and registers them by making

them correspond to each other in a pack file 303 by an original registering means 302. A client 200 transfers the original data registered in the server 300 by an original down-load means 201, and proofreads the original data by an original proofreading means 202, and transmits the proofread original data to the server 300 by an original up-load means 203.

LEGAL STATUS

[Date of request for examination]	24.10.1997
[Date of sending the examiner's decision of rejection]	27.06.2000
[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]	
[Date of final disposal for application]	
[Patent number]	
[Date of registration]	
[Number of appeal against examiner's decision of rejection]	2000-11677
[Date of requesting appeal against examiner's decision of rejection]	27.07.2000
[Date of extinction of right]
